Rochester Institute of Technology

Computational Analysis of Gender Perception in the UK Before and After Women's Suffrage

PRESENTED BY
Shaista Syeda

FACULTY ADVISOR
Ashiqur R. KhudaBukhsh

- I have performed Data Segmentation and I have a total of 6 files
- I have tokenized these files
- Performed Basic Statistical Analysis
- Performed Keyword Analysis
- Analysis of Male and Female Pronoun Count

Github Link - <https://github.com/xssti/Analysis-of-gender-perception/tree/main/ADS-2>

Statistical Analysis

Total Documents: 6

Total Sentences: 4360935

Total Words: 306700162

Average Word Count per Document: 51116693.67

Average Sentence Count per Document: 726822.50

Number of Tokens

Top 10 frequent words

```
[('hon', 3154640), ('would', 3146208), ('government', 2064273), ('member', 2006418), ('house', 1744486), ('state', 1703251), ('right', 1580868), ('one', 1549606), ('year', 1511137), ('lord', 1378509)]
```

Word Cloud of most frequent words for the year 1901-1950

Count of Keywords related to women

Count of Keywords related to women

Male vs Female Pronoun Count

- Get Access to HPC Servers
- Get the Female and Male pronoun count for each year
- Word-embedding to find the words associated with Men and Women
- A Machine Translation-based analysis between 1850 – 1900 and 1950 – 2000 data
- Fine-tune BERT and GPT2 on the 1850 – 1900 and 1950 – 2000 data and analyze the differences

The End

Thank you
